

How Helpside Saves Small Businesses Time

Accurate Payroll Processing

If you are processing your own payroll, fixing an error may take longer than completing payroll in the first place. It doesn't help when the errors must be corrected ASAP and not on your normal payroll schedule. If you're not careful, payroll tasks can steal your time each week.

Less Paperwork

Employees come with a lot of paperwork. From W-4s and I-9s to verifications of employment and wage garnishments, Helpside makes employee administration easy. We also have technology tools in place to allow employees to change their own personal information including updating W-4s and direct deposit accounts so these requests don't come your way.

Timely Employer Tax Filings

A PEO like Helpside handles employer tax reporting and filing on your behalf and even assumes the responsibility for accuracy. PEOs take care of:

- W-2 processing
- 940 and 941 filings
- Federal and state withholding
- State unemployment

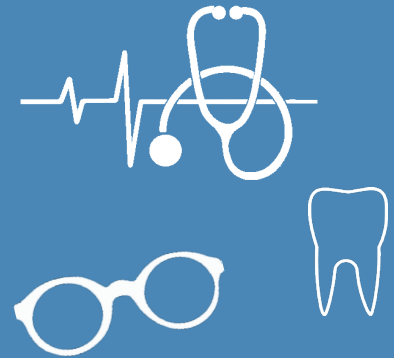

Peace of Mind

The laws employers must comply with are often changing. Researching these things on your own takes a considerable amount of time. The HR experts at Helpside keep you informed and provide real-world advice for handling the most difficult employee issues.

Benefits Expertise

From initial benefits enrollment to annual open enrollment, let our team guide your employees through the enrollment process. Employees with benefits questions can call Helpside directly, so you don't need to be the middleman.

Simplicity

Employee HR issue? Call Helpside. Interested in exploring retirement savings options for your employees? Call Helpside. Injured employee? Call Helpside. PEOs provide peace of mind of knowing that you only need to call one vendor for all of your payroll, HR, benefits, and risk management needs, rather than playing phone tag with multiple vendors.

Helpside is a Professional Employer Organization (PEO) based in Utah. Small businesses who partner with Helpside gain access to exclusive resources and expertise in payroll, employee benefits, human resources, labor law compliance, employee safety, and workers' compensation.
